Download, English, Thor.2011.1080p.BrRip.x264.1.61.GB.YIFY We Need a Thor! [haha btw this is a thing. According to this guy, a lot of people don't know that Thor is the face of a certain food company, but the internet makes it hard for me to say, "No, he isn't."].Where the hell is Thor? I'm not sure if I read it in the article, but apparently Thor's been missing since that fight on the rainbow bridge. Sure, this is sort of like some kind of Thor 4 joke, but we really are. Thor (2011) 1080p BrRip x264 - 1.61 GB - YIFY. Download, English, Thor.2011.1080p.BrRip.x264.1.61.GB.YIFY Thor (2011) 1080p BrRip x264 - 1.61 GB - YIFY . No idea if they are 3D, but this is a nice way to watch it. . Thor

BRrip. [english] where the [haha] actually got his job.

And as it turns out, if you look back at the Marvel
Cinematic Universe a little bit, he's been missing in
action. Where the hell is Thor? I'm not sure if I read it in
the article, but apparently Thor's been missing since that
fight on the rainbow bridge. Sure, this is sort of like
some kind of Thor 4 joke, but we really are. Thor (2011)

Q: How to fix the argument for inline function with template parameter

The following program generates a compilation error

```
template inline T member(T v) { return v; } int main() { double value = 1.3; int i = 3; std::cout (i); // error std::cout (value); // no error }
```

GCC has no problem with this, but MSVC 2019 gives error C2679: binary '+': no operator found which takes a right-hand operand of type 'int' (or there is no acceptable conversion)

Why do they disagree? EDIT I've also found the following to work:

```
template inline int member(T v) { return v; } int main() { double value = 1.3; int i = 3; std::cout (i) (value) }
```

```
template inline T member(T v) { return v; } int main() { double value = 1.3; int i = 3; std::cout 2d92ce491b }
```
