pdf Cited by 12 To determine the effectiveness of multilayer crack assessment techniques with DesignBuilder, the crack volume and the type of crack were experimentally analysed., use of DesignBuilder for the characterisation of cracks. by C Bonaventure 2020 Cited by 12 In this paper, results from a Design Builder based simulation are presented for the... . by F Ramon 2020 Cited by 10 In this paper, experimental data were used to validate a numerical model to simulate. energy efficiency of a research building and evaluate the indoor . by A Hernandez 2020 Cited by 3 . simulated using DesignBuilder was compared with the experimental one. by R Monroy 2020 Cited by 1 Cited by 1 . by G Coda 2020 Cited by 16 An in-depth analysis of the function of DesignBuilder was carried out.. simulations with thermal mass and thermal storage. by L Aymat 2020 Cited by 16 . with air leakage on an existing building. by J Fernandez 2020 Cited by 15 . by R Vogl 2020 Cited by 7 The study focuses on a typical passive house built in West Sweden in 2006. The . by P Henriksson 2020 Cited by 8 The indoor comfort of two types of passive house with two different methods of operating AC. The design of the house was carried out using DesignBuilder. by M Balogh 2020 Cited by 3 This paper is a step-by-step guide for design, drafting, analysis, and simulation of passive- houses.. Passive houses are very effective buildings and it is possible to combine them with and low-energy retrofit. by L Szentesi 2020 Cited by 2 . of DesignBuilder for energy simulation of commercial buildings. by J Aguilera 2020 Cited by 5 This paper discusses a case study of four passive houses in France and investigates the . by F Spohn 2020 Cited by 1 This paper presents a new design tool for simulating and analysing passive houses. Simulation and design are carried out on the same tool. by G Savanier 2020 Cited by 7 The conventional thermal comfort index method was employed to define the thermal comfort of a passive house, and 2d92ce491b
