A: Download for latest version, WinZip 23 Build 13600 from official site: and you will see w23.exe which you need to install. Q: Oracle Apex 5.2 installation problems I am trying to install Oracle Apex 5.2 on my laptop which is having Oracle Database 11g. I have the following error message error: Failed to initialize the application. Check your application configuration. Failed to initialize the application. Check your application configuration. Error: Failed to initialize the application. Check your application configuration. What configuration do i need to take care of this? Please help me to install this application. A: You need to go through the following steps Make sure your current Oracle Data base is compatible with the Oracle Apex version. Run the ORACLE\_HOME variable and make sure it is set correctly Define the ORACLE\_SID variable and make sure it is set correctly Create the environment variable ORACLE\_BASE to the path of your Oracle home (from the environment path) Create the environment variable ORACLE\_DOMAIN\_BASE to the Oracle base path (from the environment path) Now you can use the oracle\_app\_home to define the path for the oracle home directory. Make sure this directory is in the environmental variables PATH. Refer this link [The Los Angeles Lakers have reached a preliminary agreement in principle to swap their 2018 first-round draft pick for Oklahoma City Thunder guard Russell Westbrook, according to ESPN's Adrian Wojnarowski. The Thunder will send Lonzo Ball, Brandon Ingram, Josh Hart and Kuzma to Los Angeles to give up Westbrook, it has been reported. Westbrook, one of the league's most dynamic players, had recently requested a trade from the Thunder, citing displeasure in the direction of the franchise, according to ESPN's Royce Young. The Lakers, a franchise that has struggled to win consistently over the last few seasons, have been searching for an impact player since LeBron James left to join the Lakers in 2018. Westbrook, 30, had a career](#) 2d92ce491b
